To: Ford, Ryan M. <ryanford@slac.stanford.edu>

Good afternoon,

Below is the information necessary to get your device connected to the network. You may not see the SSID actively advertised, but you should still be able to join it. While the device is now registered in NetDB, I need a bit more information to make the record more accurate. Could you provide me the model of the Raspberry Pi? As well as the location where it will reside?

Hostname: ODTSSCAN01

IP address: 172.26.47.140

Subnet mask: 255.255.255.128

Gateway: 172.26.47.129

SSID: SLAC-CADA

Psk: W@LkinTh39ark-

Thanks,
Daniel RG
